

SIDERURGICA LATINA
MARTIN

SIDERURGICA LATINA MARTIN

Established in 1965, Siderurgica Latina Martin focuses on manufacturing PC Strand (3-7 wires), PC wire and Phosphate Cold Drawn Spring Wire in accordance with the most recognized international standards.

PRODUCTIVE CAPACITY OF STEEL

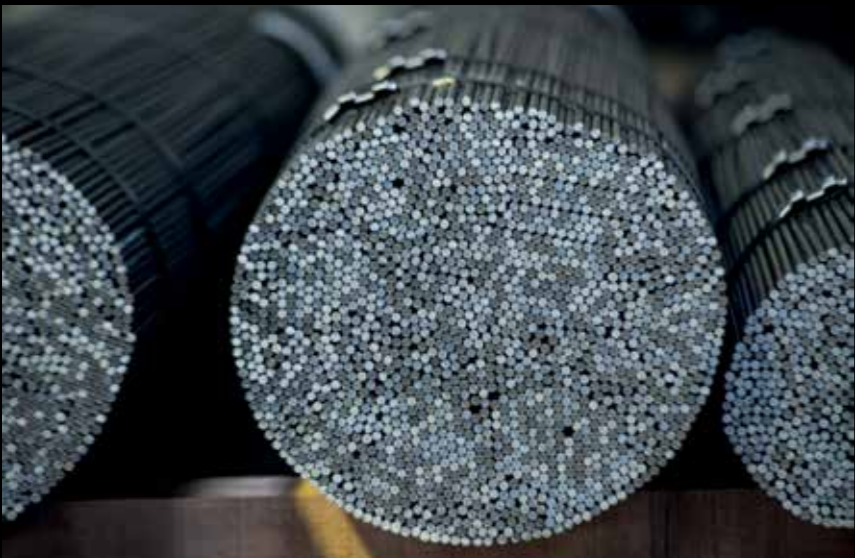

Siderurgica Latina Martin turns High Carbon Wire Rod into finished products through an integrated manufacturing process starting from in-house Pickling & Pre-Coating, Cold Drawing, Stranding, Thermo-Mechanical process to Rewinding and Packaging.

CONSTRUCTION STEELS

PC Strand and PC Wire are mostly intended for the construction and railroad infrastructure industries to produce precast concrete elements, concrete poles, railroad sleepers as well as for pre-stressing and post-tensioning applications.
